**Hello, Kids!**

My name is Eco the Energy Dog.  
I'm here to help you find ways to  
save energy in your homes!

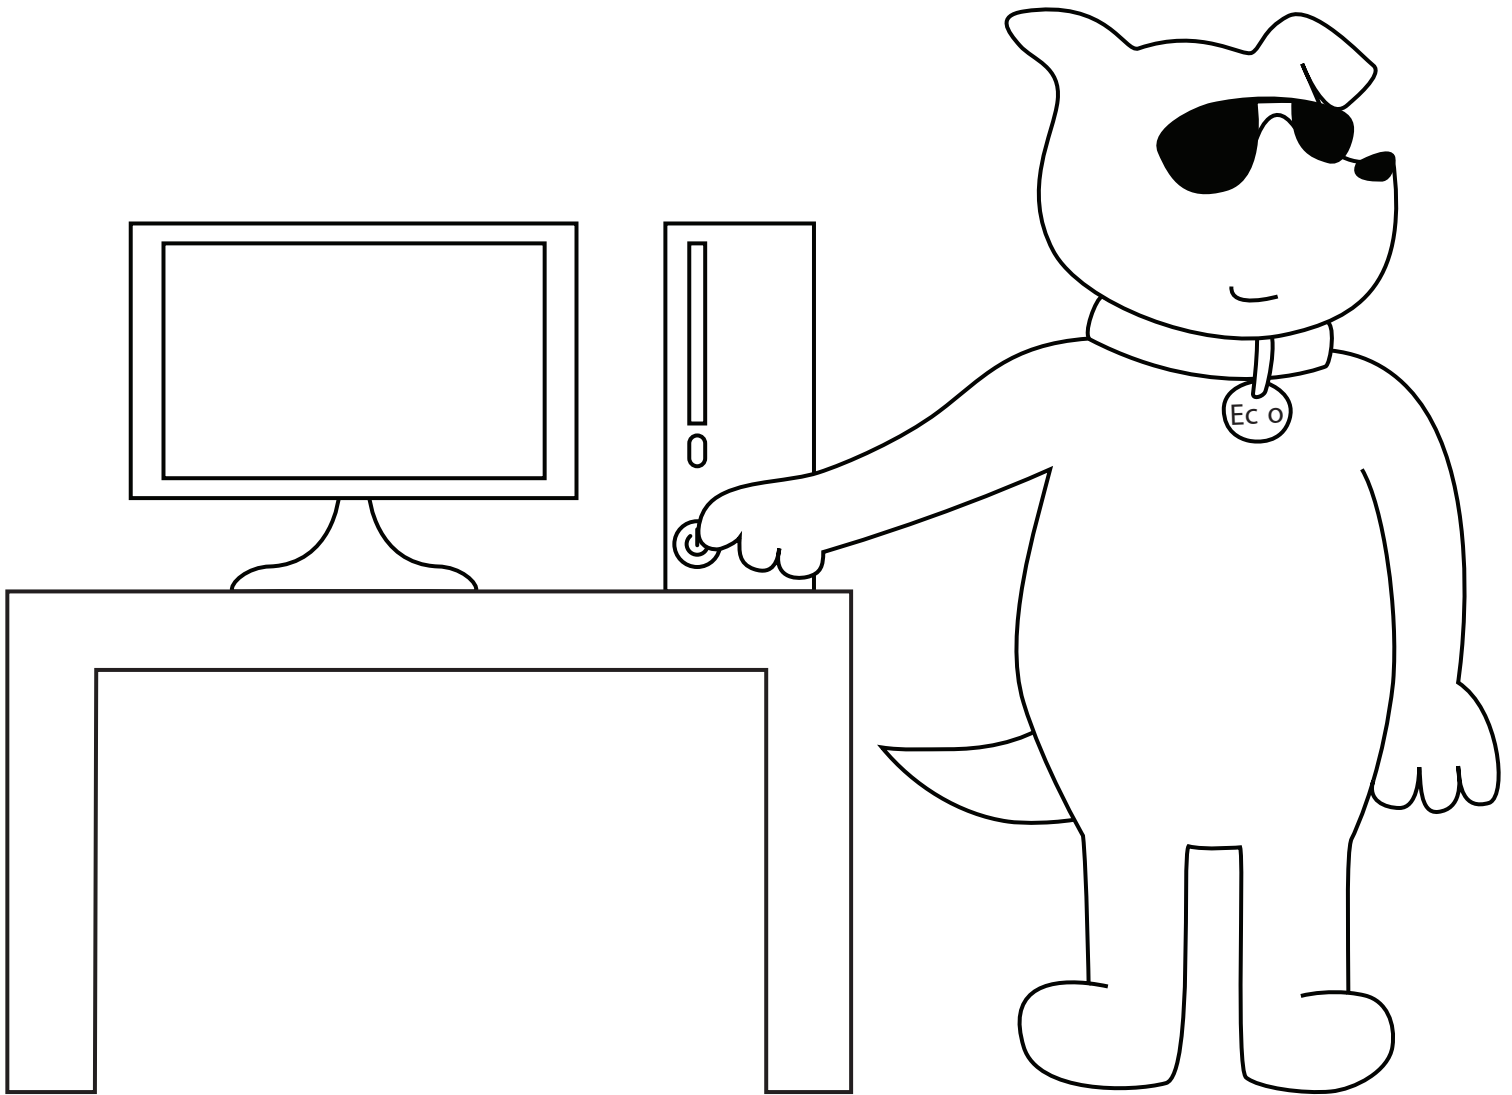

## Unplug and Save

Unplugging things around the house when they aren't being used is an awesome way to help mom and dad save energy. Ask your parents when you can help unplug energy hogs around your house.

## **ECO SAYS:**

“Now it’s your turn! Use this page to show me how YOU can save energy this way...”

## Turn Off and Save

If you can't unplug something, make sure you turn it off when you are done using it. That way, it won't be using as much energy. Ask your parents when you can turn off energy hogs around your home.

## **ECO SAYS:**

“Now it’s your turn! Use this page to show me how YOU can save energy this way...”

## Close the Blinds

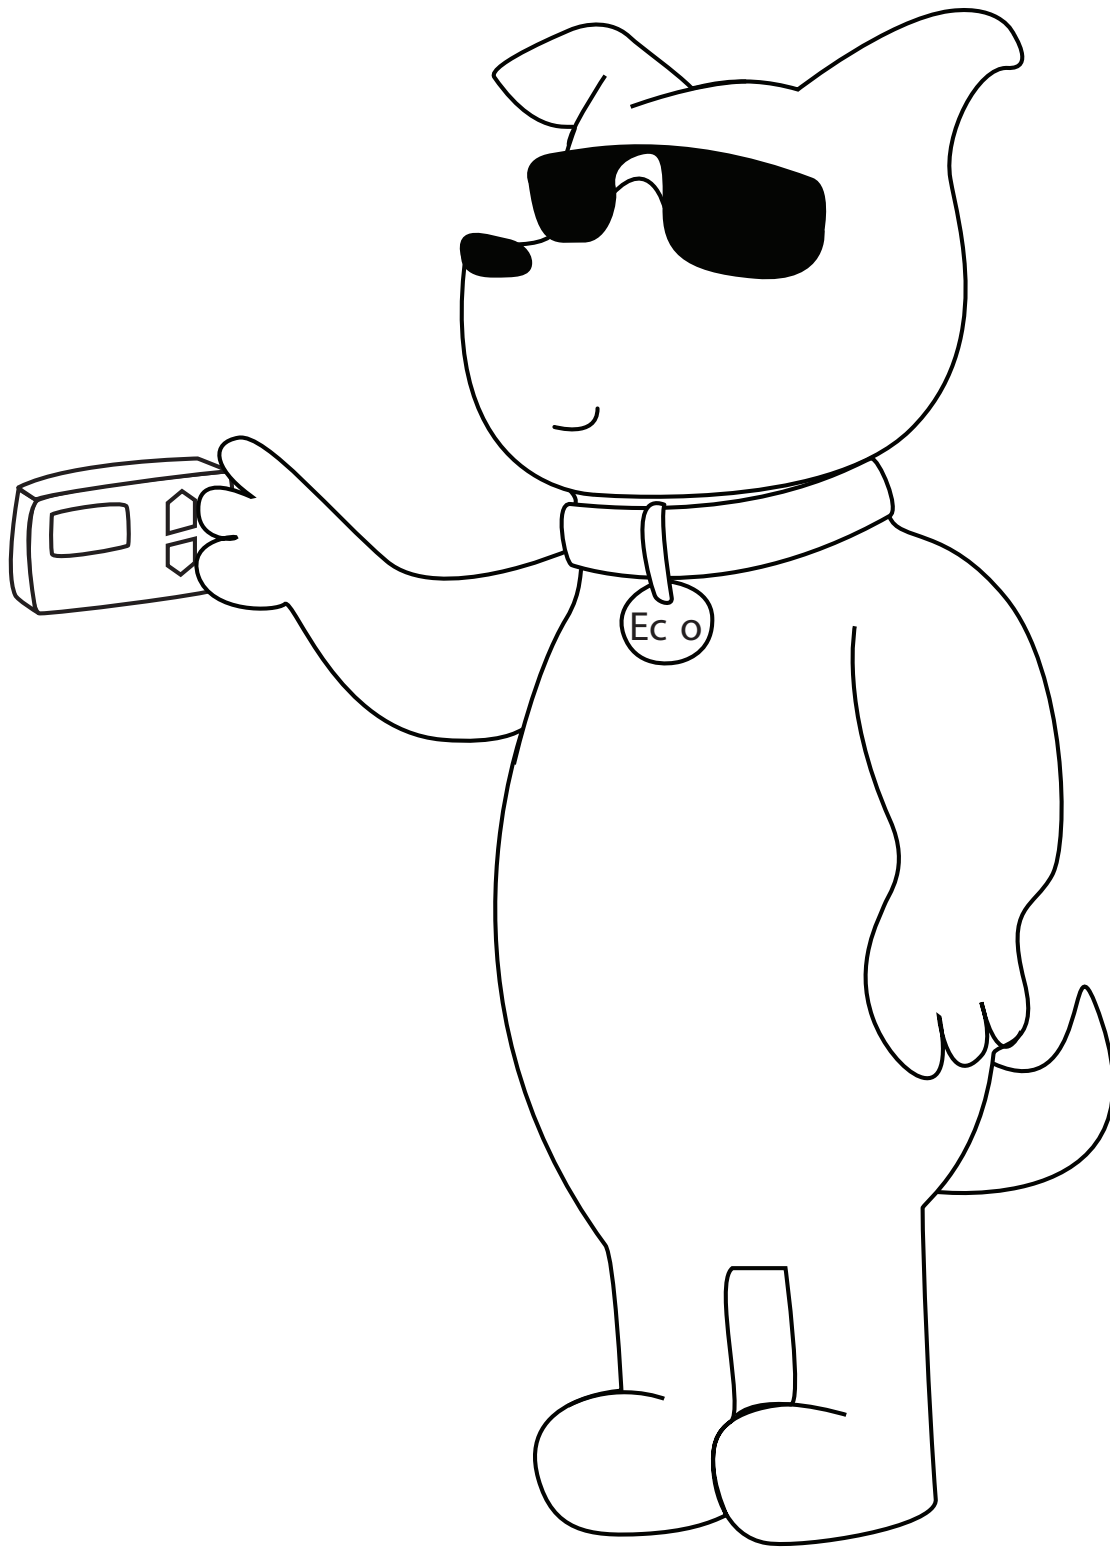

Remind your parents to close the blinds when you are leaving your house. The blinds will help keep warm air from heating your home in the summer, and act as a shield to help keep cold air out in the winter.

## **ECO SAYS:**

“Now it’s your turn! Use this page to show me how YOU can save energy this way...”

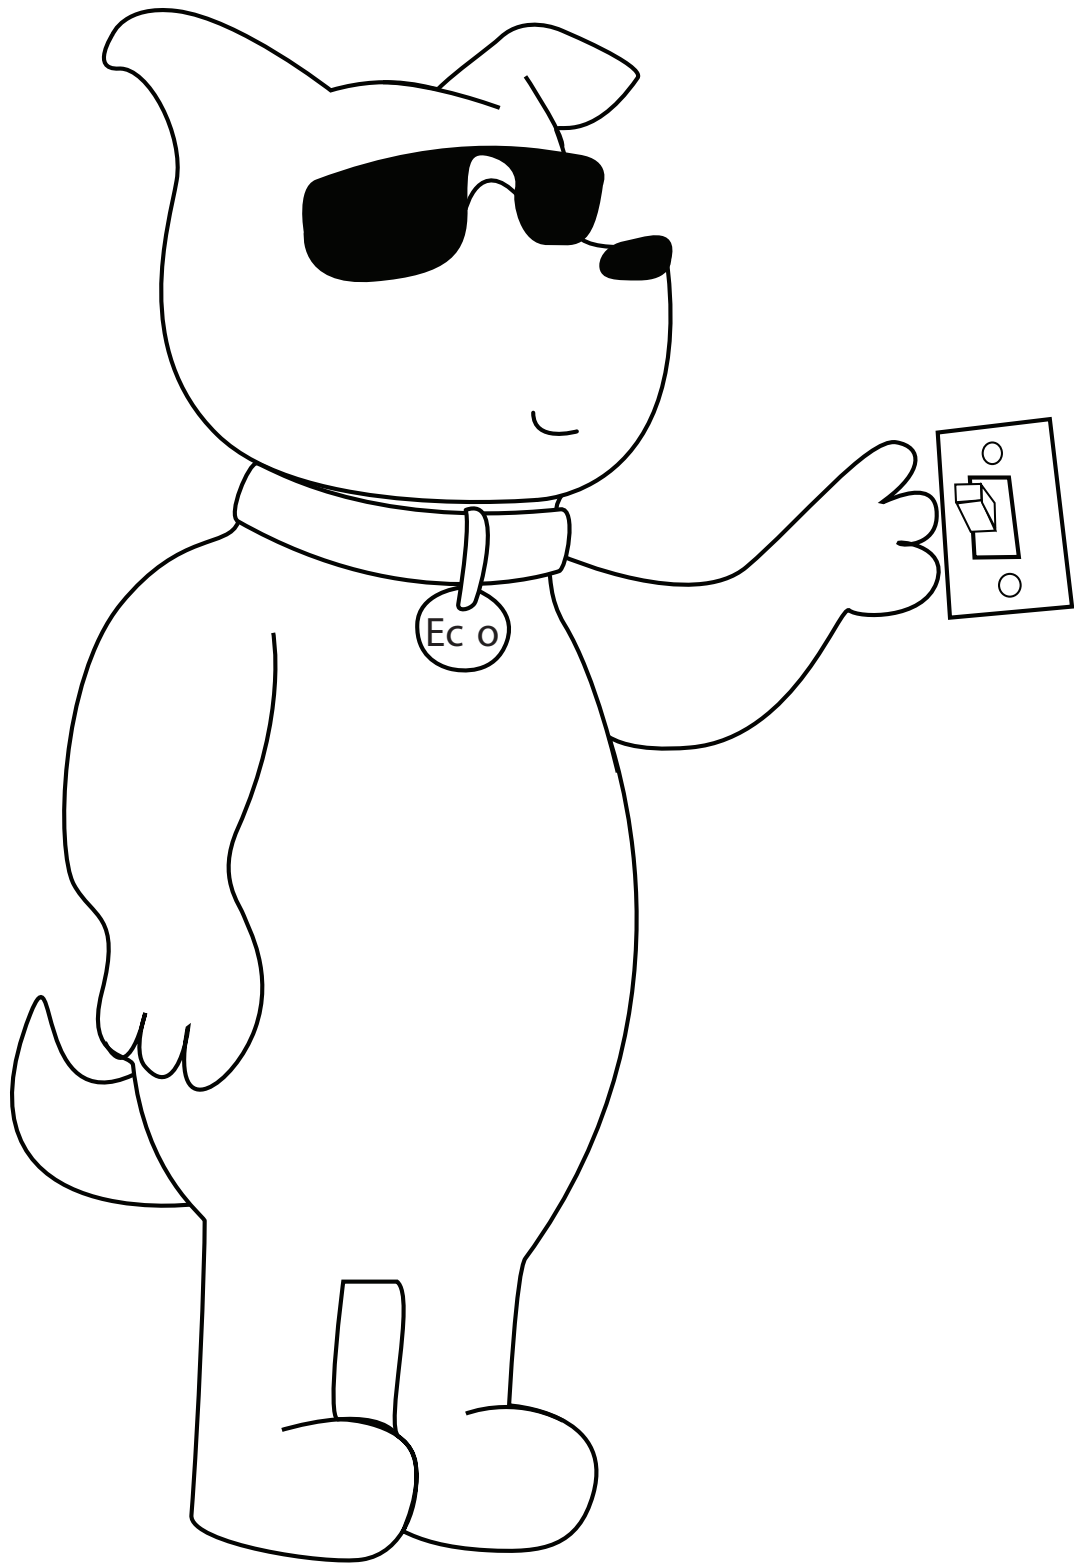

## Check the Thermostat

Heating your house makes up almost 25% of the total energy your house uses! Help Mom and Dad keep the thermostat in check by making sure it doesn't go lower than 70°.

## **ECO SAYS:**

“Now it’s your turn! Use this page to show me how YOU can save energy this way...”

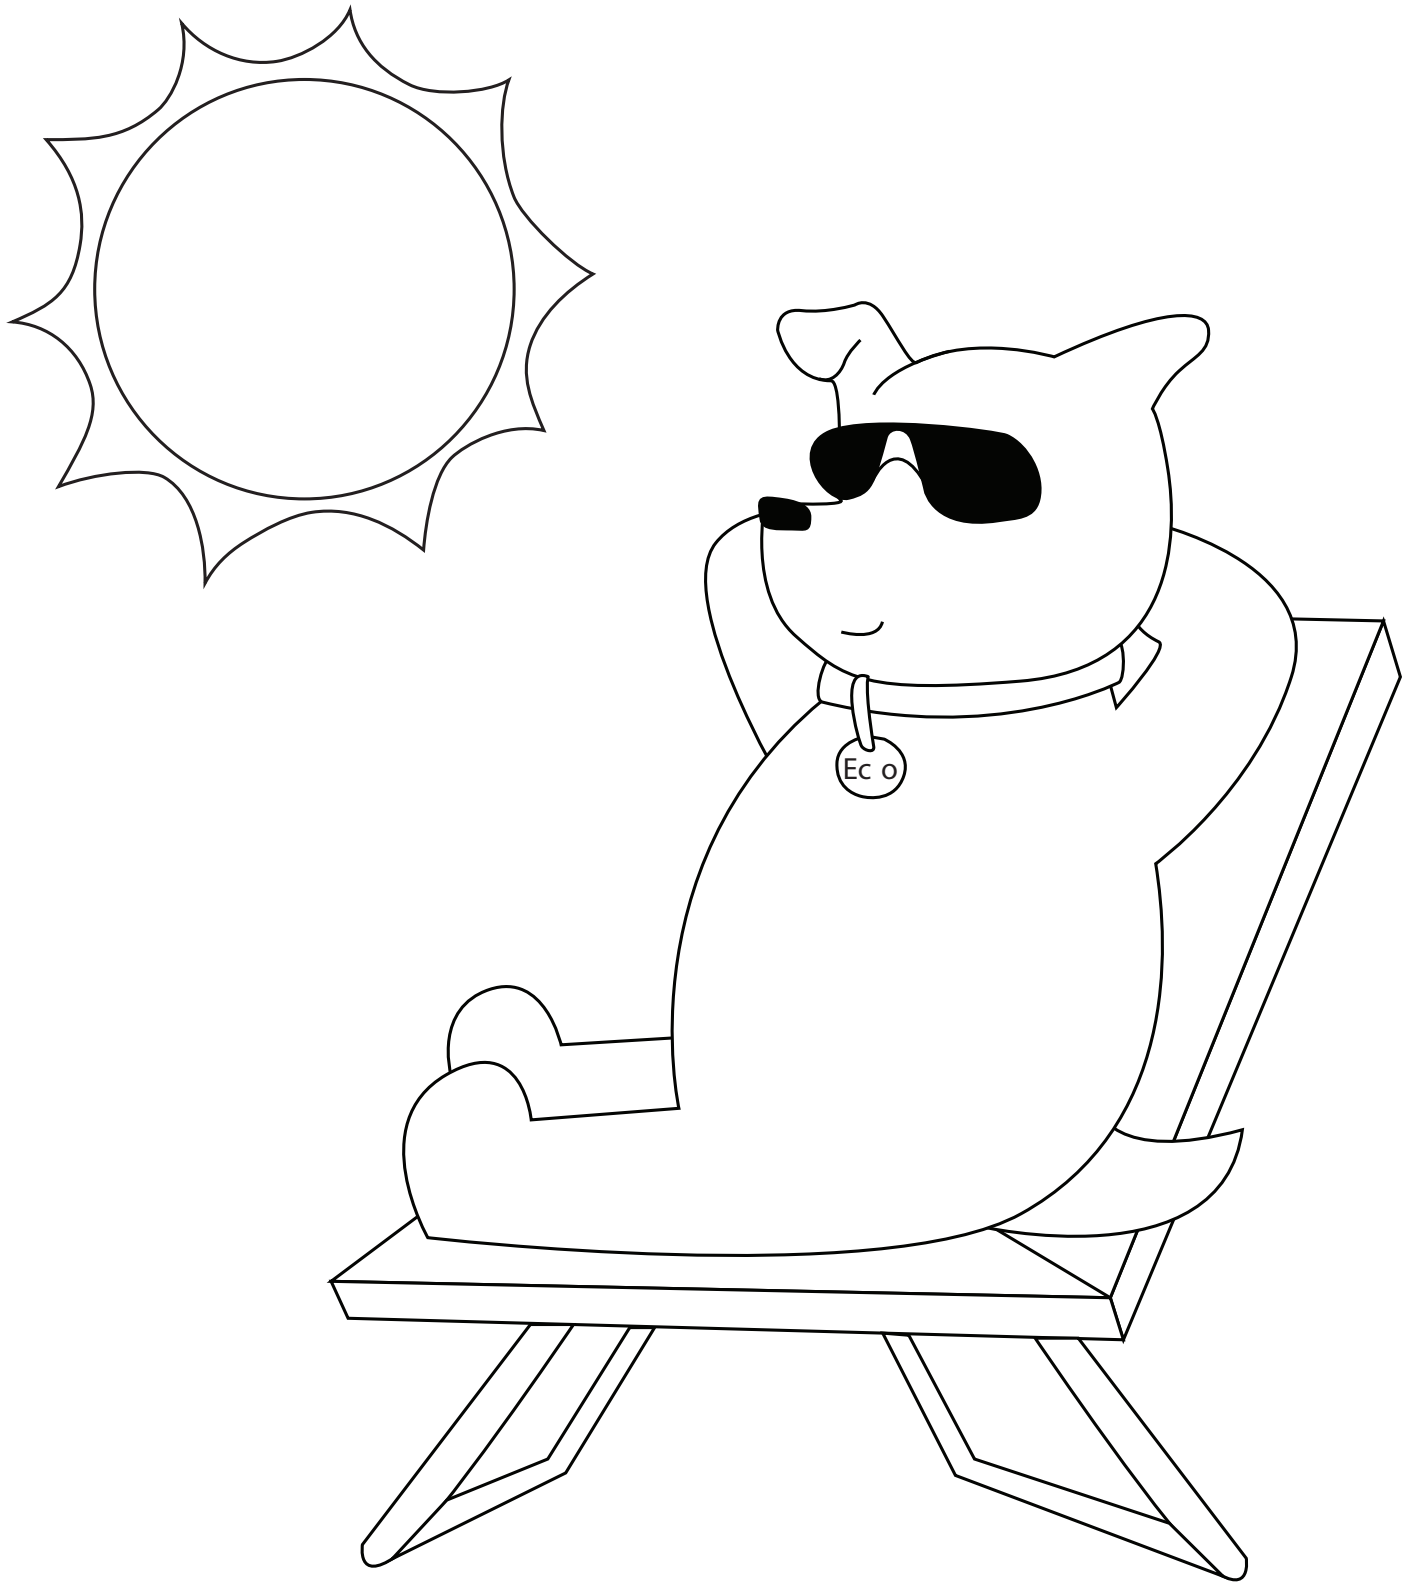

## **Last Out? LIGHTS OUT!**

Always remember to turn all the lights out when you are leaving a room, even if you are going to come back later. Shutting off unneeded lights is the easiest way to save!

## **ECO SAYS:**

“Now it’s your turn! Use this page to show me how YOU can save energy this way...”

## **Sun Out? LIGHTS OUT!**

If the sun is shining you may not need to turn on lamps in your house. Turn out the lights and use daylighting during the day with your parent's permission.

## **ECO SAYS:**

“Now it’s your turn! Use this page to show me how YOU can save energy this way...”

YOU can make a difference  
because every little bit helps!  
Follow these steps to help save  
energy and make the world a  
better place!
